DRINK SAFER

The infographic illustrates a three-step water purification process. It begins with a white pitcher pouring water into a glass containing various white icons of germs and bacteria. A blue arrow points to a white portable water filter labeled "Water to Go". A second blue arrow points to a glass filled with clean blue water, featuring a white star icon to signify purity.

What makes Water-to-Go filters so unique?

- We combine 3 technologies into our patented filter.
- We utilise technology originally developed for NASA.
- We filter out over 99.9% of:
 - Bacteria
 - Viruses
 - Protozoa
 - Chemicals (E.g. Chlorine & Fluoride)
 - Heavy Metals (E.g. Copper & Lead)
 - Bad tastes and odours
- Effective on all non salt water sources, worldwide.

Where has it been tested?

- Water-to-Go filters have had extensive testing carried out against internationally recognised standards by industry specialists in Europe, USA and India.

London School of Hygiene
& Tropical Medicine

BCS Laboratories

Bangalore Test House

Environmental

=

1x 75cl filter is equivalent to
400 single-use plastic water bottles

=

1x GO! filter is equivalent to
260 single use plastic water bottles

Why Water-to-Go?

- Provides Duty of Care/CSR Responsibilities
- Environmentally Friendly
- Lightweight and cost effective.
- Targets 4 of the United Nations' Global Goals:

- Work with us and help us reduce the blight of single use water bottles.

- Strategic alliances.
- Brandable bottles.
- Incentives for your clients.
- Deliver your sustainable / responsible travel goals.
- Support your charities and worthy projects
